DEVICE MAKES  
FLYING SAFER L. D. S. ELDER  
LOSES MEMORYSalt Lake Air Mail Pilot  
Demonstrates New  
Aerial Compass

SALT LAKE, March 5.—Through a device invented by Herbert Marsh and Dean G. Wright, perfect safety in flying through treacherous storm clouds is assured in a test flight made over the city Saturday by Kenneth Unger, Jr. mail pilot. The device is known as a "trimming indicator," but in reality is more of an aerial compass.

The device consists of four glass tubes, two of which show lateral deflections of the plane, and two to show the fore and aft, or longitudinal deflections. In each tube is a small ball of mercury which makes contact with the battery circuit when the plane drops either up or lateral beyond its normal flying position. This contact is indicated, also, on the dash instruments of the plane, which show silhouette of the plane, with lights on the four extreme points of the flying ship.

In flying through a storm, or above a storm, and unable to see the ground, the pilot is unable to tell whether he is flying straight or upside down. This new invention, according to demonstrations, keeps the pilot informed as to just how his machine may be flying. In the test flight Unger rose a distance of 1500 feet during the storm, which began in the afternoon and flew half way to Ogden and back. Unger landed his plane on the Woodward field with ease and had no difficulty at any time in ascertaining his position. The tubes are capable of adjustment with thumb screws, Unger explained, so that the contact can be regulated with ease.

With the adoption of the invention, it is said, airplane travel will be virtually as safe as a railroad train—this depends, however, on the perfection of the airplane motor. It also will be of much value in the training of aviators, as it will make their initial flying safe. It is planned to install the mail planes which make daily flights between here and Elko, Nev., piloted by R. R. Unger, and between this city and Rock Springs, Wyo., piloted by T. O. Haines. The device has been submitted to the United States patent office and letters patent are expected shortly.

FIND HOG CHOLERA  
IN CACHE VALLEY

SALT LAKE, March 6.—Hog cholera has broken out in Cache Valley and several animals have already died from the disease, according to a report received by Dr. W. A. Stephenson, state livestock inspector. Although hog cholera has been prevalent in Utah county during the last few months, this was the first report of outbreak in Cache county.

The disease was diagnosed by Dr. Sven Nelson of Idaho and Dr. A. J. Webb of the state board of agriculture was sent to take charge of the work of eradication. He will be assisted by Dr. W. H. Hendricks of Richmond. It is estimated that about 150 hogs have been exposed and will have to be vaccinated.

"One cause for the prevalence of hog cholera in Utah this winter," Dr. Stephenson said, "is that the farmers have been actually too poor to afford the money necessary to buy vaccine and virus to protect their hogs. In this connection attention should be drawn to the method recently adopted in Utah county, which may be followed wherever similar provision is made."

LAND COMMISSIONER  
VISITING IN S. L.

SALT LAKE, March 6.—United States Land Commissioner William Spry, who is in Salt Lake on personal business, declared that efforts of the United States land office at present are devoted to placing the department on a more efficient basis. Mr. Spry will remain in Utah several days.

"Affairs at the land office," Mr. Spry said, "are at present slow, but we are taking advantage of the opportunity to improve the system and to strengthen the personnel. In the past there have often been annoying delays in transacting business with the department and it is our object to overcome this by adopting more efficient and businesslike methods. Things are moving along smoothly, however, and we hope soon to have the changes completed."

IDAHO WOMAN WINS PRIZE  
POCATELLO, Idaho, March 6.—Mrs. C. E. M. Loux of Pocatello, president of the Women's College club, has received notice that she has been awarded first prize in a national magazine contest in which 15 letters were received. Mrs. Loux's letter, answering arguments for and against educating the girls of today, was termed the best by the judges.

Salt Lake Youth Believed to  
Be "Jean Pacque" at  
San Francisco

SAN FRANCISCO, March 6.—After registering as Jean Pacque, a youth, believed to be Eugene G. Pack, 15-year-old son of Professor Frederick G. Pack, geologist of the University of Utah, appealed to the St. Francis hotel management on Saturday night to aid him in establishing his identity. He arrived at the hotel Friday night.

Searching among his effects, Thomas Keating and Harry Boyle, assistant hotel managers, found a clergyman's transportation book bearing the name and address of Eugene Grant Pack, 501 South Thirteenth East street, Salt Lake City. Mormon religious books found also bore the same name.

From Salt Lake came word that Eugene Pack is the 15-year-old son of Professor Frederick G. Pack, geologist at the University of Utah, and has been stationed in Portland. After trying to ascertain if his son had disappeared, Professor Pack left last night for San Francisco, according to news dispatches.

Similarity between the names Eugene Pack and Jean Pacque strengthened the belief as to the true identity of the youth. Investigation by hotel officials disclosed that he had arrived here from Portland on the Shasta Limited Friday night.

The youth remembered, being in Salt Lake, Portland and other cities, but was unable to recall anything that would aid him in recovering his lost memory.

## ALSO GIRL'S PICTURE

Among his baggage were found an aviation helmet, leather puttees and an army shirt, along with pictures of a wrecked airplane and a beautiful girl. The youth admitted that he could pilot an airplane. He remembered being hit on the head, but could not say when or how it happened.

The girl, he said, was "Peggy of Salt Lake," but he could not recall her name or tell whether she was wife, sister or sweetheart.

According to the boy, he did not discover his loss of memory abruptly. "It gradually dawned on me," he said, "that I did not know who I was, how I had got here or what I had been doing, so I decided to ask the hotel detective to try and help me. Everything seems to be a blank."

CARRIES RELIGIOUS BOOKS  
After receiving answers to questions sent to Salt Lake, hotel officials said they were convinced that the youth was young Pack. They believe he suffered an injury on the head either during the war or recently, which resulted in his lapse of memory.

Pack, if it is he, could remember but little of what he had done since arriving in San Francisco. He recalled eating breakfast Saturday morning in a downtown cafe, and visited Chinatown that night, but that was all.

One of the religious books found in his baggage was entitled "Doctrine and Covenants of the Church of Jesus Christ of Latter-day Saints." Dr. Keating, the manager of the hotel, said the book was found on the outside cover. The other was a Bible. On the flyleaf of both books were written "From the Bishopric and Saints of the Thirtieth Ward, Salt Lake City."

The youth's clothing had all been purchased in Salt Lake. Hotel stationery discovered in his suitcase showed that he had been staying at the Hotel Excelsior, Portland, Ore. The amnesia victim is about 19 years of age, five feet 10 inches tall, 135 pounds in weight, slender build, black hair. This description is believed to tally with that of young Pack.

DESCRIPTION TALLIES  
SALT LAKE, March 6.—Professor Frederick G. Pack of the University of Utah left last night on a late train for San Francisco where he has gone to determine if the young man who registered at the St. Francis hotel on Friday night last as Jean Pacque is his son, Eugene G. Pack. The son, according to Professor Pack, is only 15 years of age and the description received by the father tallies with that of his son.

The youth left Salt Lake for Portland, Ore., two weeks ago, his father said, having been in Salt Lake since last August, when he was brought back here because of illness. He was sent on a mission a little more than a year ago to the northwestern states, and his headquarters were in Portland. When he returned last week by the late August train, he was suffering with stomach trouble, Professor Pack said last night, and gave no indications of loss of memory.

ROBBERY IS SUSPECTED  
Shoot after Professor Pack took a westbound train last night a message was received by members of his family from President Heber J. Iverson of the northwestern states mission of the church, to the effect that the young Pack had left Portland last Thursday morning at 10 o'clock for Eugene, Ore. He took with him, the message said, a sum of money.

Efforts of President Iverson to locate Pack in Eugene were without avail, and when news was received of the amnesia case in San Francisco the Portland officials of the mission became alarmed. They believe, the message said, that young Pack was slugged and robbed.

The fact that the young man registered in San Francisco under the name of Jean Pacque is thought by officials there to indicate that he had a slight recollection of his name, the similarity of the names being obvious.

DISCOVER EGGS OF  
DESTRUCTIVE MOTH  
SALT LAKE, March 6.—Eggs of the gypsy moth destructive to trees in the west England states were discovered last week by Joseph W. Fox, county crop and pest inspector on young apple trees shipped to a Salt Lake nursery from Iowa. The eggs are to be hatched here to obtain specimens of the insect.

Each nest contained approximately 400 eggs. The insects multiply with such rapidity that serious consequences would follow in the next few years if even this small number of eggs had not been discovered.

ON STOCK DIPPING

SALT LAKE, March 6.—Modification of the proclamation of the state commissioner of agriculture requiring the dipping of cattle in certain sections of Emery county to prevent scabies or mange, is expected. The modification is expected to come as the result of weather conditions which would prevent an early start in dipping.

The mud conditions are so severe in Emery county at present that if dipping were started the dipping vats would be filled within a short time with the mud from the immersed animals. Since it costs about \$200 to charge a 2000-gallon dipping vat, it is thought advisable to await better conditions before inaugurating the dipping work.

The presence of the scabies among cattle, Dr. W. A. Stephenson, state livestock inspector, said yesterday, "was first reported on a head of a cow in Emery county, from Fremont, Neb. In the same shipment were some Shorthorns, picked up in the Denver market. The shipment consisted of twenty-four head, and was distributed among sixteen different farms and ranches in Emery county."

"The disease has thus got a two-year start, practically, before being discovered. I consider it as among the most menacing of outbreaks of livestock diseases ever to be reported in Utah."

"Our inspections, carried on with four inspectors, so far leads us to estimate that some 6000 cattle have been exposed to the disease. How many have actually contracted it we cannot say at present."

"So far our inspections have extended only to cattle in the feed lots. Several of the bulls imported, however, and other animals that have been in contact with them, are on the range in the Shinarump and San Rafael swell country. These have not been inspected as yet and we cannot tell whether the disease has been spread or not."

There are two types of the cattle scabies insect. One is known as the sarcoptic and its characteristic is that it digs deeply into the skin of the animal. It may take several dippings to eradicate this type. The other one is the predominate in the microscopical tests so far made.

Another type, known as the psoroptic, which is more readily to the dipping process.

"The dipping order set the dates from March 1 to April 1. However, there is nothing to do, under present weather conditions, but wait for improvement."

BUILD BOATS FOR  
CANYON PROSPECT

MOAB, March 6.—For the purpose of prospecting the gravel beds and canyons of the Grand Canyon of the Colorado, W. E. Mendenhall and Paul Ramsey of Salt Lake are in Moab engaged in building two rowboats. M. W. Morse of Moab will accompany them on their trip down the river as far as Lees Ferry. The boats are being built to withstand the rapids of Cataract canyon.

PIONEER WOMAN  
CALLED BY DEATH

POCATELLO, Idaho, March 6.—Mrs. John Wakeley, one of the earliest pioneer women of Utah and Idaho died Saturday in Downey, Idaho. Mrs. Wakeley came to Utah in the early 50's and later moved to Idaho where she has resided in Downey for a score of years. She had been ill for a long period.

LIFT QUARANTINE  
ON GATHERINGS

POCATELLO, Idaho, March 6.—The McCammon board of health has placed the quarantine which had been placed on public gatherings of more than five persons, due to the epidemic of influenza. The light nature of the epidemic caused the lifting of the quarantine.

JUMPS FROM TIP OF  
EASTERN MONUMENT

BALTIMORE, Mar. 6.—Frank Deveney, an employee of a local taxicab company, Sunday jumped to his death from the Washington Monument in Washington Place. Deveney had been ill and his associates declare his mind had been affected.

The suicide occurred in the center of Baltimore's most exclusive residential section. Walking to the platform atop the monument, Deveney was seen to climb over the parapet. He slowly climbed to the rim, carefully lowered himself to arms' length and dropped the 164 feet to the base of the monument. Virtually every bone in his body was broken.

MOURNS AT BIER OF  
HIS SLAIN PLAYMATE

HACKENSACK, N. J., Mar. 6.—Among the many chums who mourned Sunday at the bier of 13-year-old Philip Wagner of Allendale, was Harold Vermeulen, 12, who accidentally shot and killed him Saturday, while they were playing "wild west."

The Vermeulen boy was showing his playmate a new small calibre rifle, given him by his father, suggested Wagner. "Let's play wild west," suggested Wagner. "You be the cowboy and I'll be the Indian."

A moment later Wagner was shot through the heart.

SCOUT LEADER  
MAKES REPORT32 Troops Functioning in  
Ogden With 800  
Enrolled

The monthly report of Scout Executive G. A. Goates to the Ogden Council of the Boy Scouts of America, shows considerable progress for the scouts' organization in Ogden. The complete report for February follows:

Thirty-two troops are now functioning under the supervision of the local council with an enrollment of 800 boys. Registrations are, however, pending with Troop 12 and Wilson Lane No. 1. Weekly meetings have been held by these troops.

Scout leaders' training school conducted at the Utah Agricultural college was attended by five Ogden boys who are candidates for assistant scoutmaster positions. Expenses of these scouts was paid by the respective Young Men's Mutual Improvement associations interested in sponsoring a group of Scouts. The Scout executive spent a part of two days at this school in charge of two classes.

## SCOUT LEADERS' MEETING

On February 4 the regular monthly meeting of scout leaders was held and well attended. At this meeting the active scout leaders were presented to President Frank Francis and Commissioner E. Sebbelov. A general outline of the 1922 program was presented and agreed upon.

On February 29 a special meeting of district commissioners and authorized representatives of scout sponsoring institutions was also held. On February 13 a meeting of deputy scout commissioners was held and the details of the work of supervision of the field divisions considered.

Three special meetings were held with troop committees of Troops 10, 12 and No. 1, at which vacancies were filled, new members added to the committees and a reorganization effected.

Seventy-three office conferences with scout leaders were held during the month. Ten speaking engagements to mixed audiences interested in scouting have been filled by the scout executive.

## CARRY OUT PROGRAMS

During Scout Anniversary week Troops 2, 4, 7, 10, 12, 15, 18, 20, 21, 23, 24, Plain City and Taylor carried out the full program for the week. Other troops participated only in part of the week's program, and are not here taken into consideration in this summary. A brief summary of the activities of the 14 troops reporting shows the following:

Forty-four "Parents and Scout Banquets" and special scouting programs were held.

949 adults, parents and friends of the boys attended these programs and played with the Scouts at these "Parents and Scouts Get Together."

251 fathers spent the evening (over one hour) home folks' day with his Scout son.

153 Boy Scouts were reported participating in the Anniversary week program.

234 Boy Scouts attended Sunday school on Scout Sunday.

295 explanations of the Boy Scout movement were made by registered Boy Scouts to boys not in Scouting.

COMMITTEES REORGANIZED  
Three troop committees were reorganized and vacancies filled. Two troops reorganized.

Thirty-one Tenderfoot Scouts advanced to Second class.

Ten Second class advanced to First class.

Forty-seven merit badge applications were approved and filed for awards.

193 Scouts were reported as averaging above 85 per cent in their studies at school at last report.

202 Scouts in teams of two in uniform repeated formally the scout oath and laws with explanations during the week to pupils in class rooms in the various school buildings.

Four troops reported hikes (because of weather conditions this part of the program was deemed inadvisable).

Fourteen special scouting sermons were delivered by pastors, or bishops, and nine special speakers who emphasized scouting as a boy welfare program, and the fine spiritual qualities of the "Scout oath and law" as an ideal guide for boys.

Seventy-two new Scout registrations were made during the week, an increase of enrollment of almost 10 per cent.

Seven assistant scoutmasters and two scoutmasters were enrolled.

One new troop was organized at K. Scout anniversary week program proved to be a great stimulus to scouting and puts us well under way for pending activities. Many favorable comments and letters of congratulation from the national scout leaders have been received during the anniversary week program. One hundred twenty-five copies of the anniversary week bulletin were mailed upon request to other cities interested in scouting.

Grip Left You  
a Bad Back?

ARE you getting over a cold or grip only to find yourself a victim of backache?

Are you suffering headaches, too, dizzy spells, a dull, tired, worn-out feeling and annoying kidney irregularities? Then don't delay! Physicians agree that a vast number of the worst cases of kidney trouble are the result of germ diseases. In every infectious

disease the system is alive with poisonous germs and bacteria. The kidneys are overwhelmed with the rush of new work; they break down, become congested, inflamed and diseased. Too often the real trouble is lost sight of until some dangerous kidney ailment sets in. If your kidneys are falling behind, don't wait for serious trouble. Begin using Doan's Kidney Pills today. Doan's have helped thousands and should help you. Ask your neighbor!

## Read How These Ogden Folks Found Relief:

Wm. Hadley, 1032 Twenty-fourth street, says: "Whenever I have had an attack of kidney complaint, which was usually brought on by a cold settling on my kidneys, I suffered severely. I could hardly get up after sitting down because of the terrible pains in my kidneys. I was greatly bothered by the irregular action of my kidneys and the secretions were scanty and burned in passage. I buy Doan's Kidney Pills at Driver's Drug Store for these attacks and they soon knock the pains out of my back and regulate my kidneys."

Mrs. Wm. Atkinson, 155 Thirtieth street, Ogden, says: "I was all run down and suffered from kidney complaint. When I tried, sharp pains would catch me in the small of my back and rack my whole system. Often I would have to sit down until the pains eased up. My kidneys acted irregularly and my hands and feet bloated. I would have terrible pains in the top of my head, too. I saw Doan's Kidney Pills advertised in Doan's Directory so I used a box from Cauler's Drug Store. They cured me of all signs of kidney disorder."

G. H. Wheeler, 2031 Madison avenue, says: "Whenever I have been troubled with weak kidneys my back has ached severely. My kidneys acted frequently, causing me to get up often during the night and the secretions were scanty and burned in passage. I also had severe pains in my head. Doan's Kidney Pills from McIntyre's Drug Store always gave me prompt relief, relieving the pains and making my kidneys well."
